ABOUT ME

Hardworking and motivated Front-End developer eager to apply combined skills in HTML, CSS, TypeScript, and Tailwind to enhance user experience and business performance. Excels in both individual and team settings, leveraging a strong work ethic to adapt quickly and contribute to project goals. Resourceful and results-driven, with a passion for building efficient, responsive interfaces using Tailwind and driving continuous improvement to meet user needs and elevate service value.

PROJECTS

Front-End:

Ecommerce Store

- Fully Responsive UI For All Devices
- Modern, Sleek yet professional look that attracts the viewer's eye.

TypeScript :

Stat Star

- A command line based app that will tell you your batting stats and analysis based on the data you provide.

Hour To Year

- A command line based hour to year convertor that will calculate how much time you will waste on your mobile phone in your whole life based on your daily screen time
